**Question 22**

Read the passage below and answer the questions that follow.

Baca petikan di bawah dan jawab soalan-soalan yang berikutnya.

The rambutan is a very common Malaysian fruit. The name of the fruit comes from the Malay word 'rambut', which means hair. This is because the fruit has hairy skin. Rambutan fruits are green when young, but as they ripen, they can be either red or yellow, depending on what type of rambutans they are.

Under the hairy skin, the fruit is actually very smooth. It has pearly white flesh with a medium-sized seed inside. The flesh is sweet and juicy. It is best eaten raw, that is, to just peel off the skin and eat it fresh. During its off season, we can buy canned rambutans from supermarkets. Rambutans can be used to make jam and jellies too.
